

Seven bottles of shell topping recalled

November 20 2006

In one of the nation's smaller recalls, the Hershey Co. has announced the recall of seven, 7.25-ounce bottles of REESE'S Shell Topping.

The product, manufactured Oct. 27, might be contaminated with Salmonella, the U.S. Food and Drug Administration said.

The seven bottles have the code 30MXB printed on the back of the bottle below the cap and carry a UPC/Bar Code of 346010.

No other Hershey's shell toppings or other confectionery items are involved in the recall.

The product being recalled was available for purchase only in the state of Michigan after Nov. 5.
