

Video: Blue Death: The frontiers of ageing research

July 30 2010

David Gems, at UCL's Institute of Healthy Ageing, leads one of the labs teasing apart the genetic nature of ageing using one of nature's simplest animals, the nematode worm.

What exactly is ageing?

More and more, ageing is being studied just like any other [genetic trait](#), yielding to an armoury of modern scientific tools.

In this short film, David and his student Cassandra Coburn take us on a journey exploring the nature of ageing and how scientists are unravelling its mysteries.
