

Transcatheter aortic valve implantation with the Edwards valve prosthesis in patients with low logistic Euroscore

August 30 2011

Results from a study presented today at the ESC Congress 2011, show that TAVI implantation in low risk patients, met with 100% procedural success (versus 95.3% in the high Euroscore group ($p=0.1$)).

"The most interesting point to observe is the absence of death at one month in the low Euroscore group, versus a mortality rate of 11.1% in the high Euroscore group ($>20\%$), ($p < 0.04$) and this result is confirmed at 1-year with 5 vs 24.8 %, (p
