

Hospital variation in pediatric in-hospital cardiac arrest survival

June 20 2014

(HealthDay)—Despite risk-standardization, there is substantial hospital variation in survival for pediatric in-hospital cardiac arrest, according to a review published online June 17 in *Circulation: Cardiovascular Quality and Outcomes*.

Natalie Jayaram, M.D., from Saint Luke's Mid America Heart Institute in Kansas City, Mo., and [colleagues](#) used the American Heart Association's Get With the Guidelines-Resuscitation registry for in-hospital cardiac arrest to identify 1,551 cardiac arrests in children (
