

Models may predict two-year mortality risk for CKD patients

March 25 2015

(HealthDay)—Risk prediction models with 16 characteristics may predict mortality risk in older adults with chronic kidney disease (CKD). The findings were published in the March issue of the *Journal of the American Geriatrics Society*.

Jessica W. Weiss, M.D., from the Oregon Health & Sciences University in Portland, and colleagues retrospectively evaluated data from individuals with severe CKD (estimated glomerular filtration rate,
