

Bird flu losses likely to top 20M with new cases in Iowa

April 30 2015

Agriculture officials say five more farms likely have been affected by the deadly H5N2 bird flu virus, including an egg-laying operation with 5.5 million chickens.

Thursday's announcement means Midwest losses will top 20 million turkeys and chickens.

Iowa Secretary of Agriculture Bill Northey says more than 15 million of Iowa's 60 million egg-laying chickens are now affected with the news of it spreading to another farm in Buena Vista County.

Thursday's numbers include two turkey farms in the same county with an unknown number of birds, an egg-laying farm in Sioux County with 84,000 chickens and an unknown number of [chickens](#) on a Clay County egg farm.

Minnesota also reported three new presumed cases, adding another 35,000 [turkeys](#) to the state's total of almost 4 million birds killed or euthanized.
