

Fasting glycemia screening is alternative to 75-g GTT for GDM

February 1 2016

(HealthDay)—Screening for gestational diabetes with fasting glycemia

seems to be an acceptable alternative to universal screening with the complete 75-gram glucose tolerance test, according to a study published online Jan. 25 in *BJOG: An International Journal of Obstetrics & Gynaecology*.

J. Ryser Rüetschi, from the University Hospitals of Geneva, and colleagues collected 2,298 complete 75-g glucose tolerance tests from pregnant women at 24 to 28 weeks of gestation. They simulated stopping the [test](#) if fasting glycemia was
