The U.S. territory of Puerto Rico has reported 1,914 new Zika cases

over the past week.

Health Secretary Ana Rius said Friday there are 10,690 cases altogether, including 1,035 involving pregnant women. Zika has been tied to severe birth defects.

Rius said 90 people have been hospitalized because of the [virus](#).

Officials also say 30 people have been diagnosed with a temporary paralysis condition known as Guillain-Barre that has been linked to Zika.

The newest statistics were released a day after the U.S. surgeon general visited Puerto Rico and said he expected 25 percent of people on the island will be infected by Zika by year's end.
