This Friday, Oct. 28, 2016, image shows a portion of a webpage offering the powerful opioid carfentanil for sale by the Shanghai Bohua Fine Chemical Co. Carfentanil is a controlled substance in the U.S., where it can be used legally to immobilize large animals like elephants. But it is not controlled in China, the top source of fentanyl-related compounds that end up in the U.S., Canada and

Mexico, according to the U.S. Drug Enforcement Administration. (AP Photo)

A few thousand dollars, a few minutes and a decent internet connection are all it takes to source carfentanil online from multiple Chinese vendors.

Two Associated Press reporters, working independently, documented multiple offers from the companies listed below to export carfentanil, a substance so toxic it has been researched as a chemical weapon and described as a terrorist threat.

These are not your typical [drug](#) barons. Many come off as solicitous business owners, starting emails with "Hi, dear," and writing scrupulous follow-up notes to drum up sales. They sent price lists and photos of their merchandise, and promoted their wares, in English, on major business-to-business websites.

Carfentanil—whose median October price from the companies below was \$3,700 per kilogram (2.2 pounds) —is banned from general use in the United States, where it is suspected in hundreds of overdoses . Fentanyl, acetylfentanyl and alpha-PVP are controlled substances in both China and the U.S. Many vendors also bragged openly about their ability to circumvent customs authorities around the world.

The companies' cheery let's-do-business attitude changed when the AP followed up with questions about the legality of the sales.

The AP did not actually order any of these products, nor test to see if they were genuine.

## BENTON PHARMACY CO.

For sale: Carfentanil, fentanyl, to France, U.K., Europe generally.

The pitch: "We have fentanyl, good quality," a saleswoman called Caroline said in an email, adding that she'd just gotten a two kilogram order.

Later, Caroline told the AP she was "shocked" to hear the AP had evidence of illicit substances on offer. "Our company has always respected China's relevant business regulations, our company has never sold the products you mentioned."

---

## WILLIAMS PHARMACY

For sale: Carfentanil, fentanyl. No destination specified.

The pitch: "Contraband will be professionally packaged and parcel will be enhanced with appropriate stealth measures," Williams promised in an email.

Asked for comment by the AP, Williams Pharmacy responded with unpublishable invective, offering no further explanation.

## APEX SPECIAL CHEMICAL MEDICINE TRADE CO.

For sale: Carfentanil, fentanyl. No destination specified.

The company pulled its product listings from the Korean business-to-

"Carfentanil is 10000 times more potent than m.o.r.p.h.i.n.e and 5000 times more potent than pharmaceutical grade (100% pure) h.e.r.o.i.n according to the illicit drug conversion table that issued by China Food and Drug Administration," the company said in its product listings.

At least five other vendors, most of which registered on EC21 in October, shared a non-functional phone number with Okkijeyhhd: Ujehhdfb Plc, Theydhhhne Plc, Okegdtsgdbfn Plc, Jhdncbvn Intl and Lkdheed Plc, which advertised a cornucopia of misspelled drugs for sale.
