

Women have worse outcomes during 36 months after ACS

November 7 2016

(HealthDay)—In a study published in the Nov. 1 issue of *The American*

Journal of Cardiology, among patients with acute coronary syndrome (ACS), women were found to have a higher mortality rate than men during 36 months of follow-up.

Przemyslaw Trzeciak, M.D., Ph.D., from the Medical University of Silesia in Katowice, Poland, and [colleagues](#) analyzed 932 [patients](#) aged
