

Intensive blood pressure Tx aids those with prediabetes

August 17 2017

(HealthDay)—The beneficial effects of intensive systolic blood pressure

(SBP) treatment are similar among those with prediabetes and fasting normoglycemia, according to a study published online Aug. 9 in *Diabetes Care*.

Adam P. Bress, Pharm.D., from the University of Utah in Salt Lake City, and [colleagues](#) conducted a [post hoc analysis](#) of data from the Systolic Blood Pressure Intervention Trial. The study assessed the effects of intensive (
