Risk of prematurity, SGA up for women on antiepileptic drugs

September 11 2017

(HealthDay)—Women on antiepileptic drugs (AEDs) during pregnancy
for epilepsy or other indications are at increased risk of giving birth to premature and small-for-gestational-age (SGA) infants, according to a study published online Aug. 30 in the *Annals of Neurology*.

Sonia Hernández-Díaz, M.D., Dr.P.H., from the Harvard T. H. Chan School of Public Health in Boston, and colleagues compared the prevalence of preterm birth (}
