

Delayed cord clamping linked to reduced hospital mortality

November 9 2017

(HealthDay)—Delayed cord clamping is associated with reduced

hospital mortality in preterm infants, according to a review published online Oct. 30 in the *American Journal of Obstetrics & Gynecology*.

Michael Fogarty, from the University of Sydney, and colleagues conducted a [systematic review](#) to compare the effects of delayed versus early [cord clamping](#) on hospital mortality and [morbidity](#) in preterm infants born at
