

Influenza vaccines in pediatric ERs likely cost-effective

November 7 2017

(HealthDay)—Influenza vaccination in the pediatric emergency

department (PED) setting appears to be a cost-effective strategy, according to a study published online Nov. 6 in *JAMA Pediatrics*.

Rebecca J. Hart, M.D., from the University of Louisville in Kentucky, and [colleagues](#) compared the cost-effectiveness of four strategies for PED-based influenza vaccine: offering vaccine to all patients, only to patients
