

In some elderly patients, levothyroxine may be linked with increased mortality

March 20 2018

Treating some elderly people with levothyroxine may put them at increased risk of death, new research from Israel reports. The results will be presented on Tuesday, March 20, at ENDO 2018, the 100th annual meeting of the Endocrine Society in Chicago, Ill.

"In patients who are 65 years of age or above with subclinical hypothyroidism and [thyroid-stimulating hormone](#) (TSH)
