

Pediatric exposures to liquid nicotine down from 2015 to 2016

April 23 2018

(HealthDay)—Pediatric exposures to liquid nicotine decreased from

2015 to 2016, but exposure still poses serious risks to children, according to a study published online April 23 in *Pediatrics*.

Preethi Govindarajan, from the Research Institute at Nationwide Children's Hospital in Columbus, Ohio, and [colleagues](#) examined exposures to liquid nicotine among children aged
