

Oral propranolol seems safe for infantile hemangioma

May 31 2018

(HealthDay)—The safety profile of oral propranolol seems to be good

for children with infantile hemangioma, according to a study published online May 29 in *Pediatrics*.

Catherine Droitcourt, M.D., from the University of Rennes in France, and colleagues used the French National Health Insurance system to perform a survey of a nationwide cohort of children aged
