

Tamsulosin does not appear to promote urinary stone passage

August 1 2018

(HealthDay)—Tamsulosin does not significantly increase the urinary

stone passage rate compared with placebo, according to a study published online June 18 in *JAMA Internal Medicine*.

Andrew C. Meltzer, M.D., from the George Washington University School of Medicine & Health Sciences in Washington, D.C., and colleagues randomized 512 patients presenting in an emergency department with symptomatic urinary stone in the ureter (
