

CDC warns of *Salmonella* illnesses linked to raw chicken

October 18 2018

(HealthDay)—The number of people sickened in a *Salmonella* outbreak

linked to raw chicken products now stands at 92 people in 29 states, U.S. health officials said today.

Of those who have fallen ill, 21 have been hospitalized. No deaths have been reported. Tests show that the outbreak strain is resistant to multiple antibiotics, according to the U.S. Centers for Disease Control and Prevention.

No single supplier of raw chicken products or live chickens has been connected to the [outbreak](#). Evidence to date indicates that many types of raw chicken products from a variety of sources are contaminated with *Salmonella*, suggesting it might be widespread in the chicken industry, the CDC said. The investigation is continuing.

CDC is not advising retailers to stop selling raw chicken or advising consumers to avoid eating properly cooked [chicken](#).
