

11th child dies in adenovirus outbreak at N.J. care facility

November 20 2018

(HealthDay)—An 11th child has died in an outbreak of a respiratory

virus at the Wanaque Center for Nursing and Rehabilitation in New Jersey, health officials say.

The "severely ill [child](#)" had the adenovirus infection and died Thursday night in a hospital, according to the state health department, *CBS News/Associated Press* reported.

Health officials provided no further details about the child.

The child was among 34 youngsters at the care facility who became ill between Sept. 26 and Nov. 12. All the patients had severely compromised immune systems due to other medical conditions, officials say, *CBS News/AP* reported. Another case was confirmed late last week.

One staff member at the facility was also affected by the virus but has since recovered, *CBS News/AP* reported.
