

Recommendations updated for postcolonoscopy management

March 13 2020

(HealthDay)—In two guideline updates from the U.S. Multi-Society

Task Force on Colorectal Cancer, published in the March issue of *Gastroenterology*, recommendations are presented for postcolonoscopy management and endoscopic removal of colorectal lesions.

Samir Gupta, M.D., from the Veterans Affairs San Diego Healthcare System, and colleagues developed recommendations for postcolonoscopy management. The authors note that for [patients](#) with normal, high-quality colonoscopy, screening should be repeated in 10 years. After removal of one to two tubular adenomas
