

FDA warns of hand sanitizers tainted with 1-propanol

August 14 2020

(HealthDay)—The U.S. Food and Drug Administration is warning

people not to use hand sanitizers made by Harmonic Nature S de RL de MI in Mexico.

These [products](#) say they contain ethanol or isopropyl alcohol but are contaminated with 1-propanol, which is not approved for hand sanitizer sold in the United States and can be toxic and life-threatening if ingested. Young children who accidentally drink these products and adolescents and adults who drink these products as an alcohol substitute are those most at risk. Drinking 1-propanol can cause central nervous system depression that can be fatal.

Symptoms of 1-propanol exposure can include confusion, decreased consciousness, and slowed pulse and breathing. People with these symptoms should get immediate medical care. When skin or eyes are exposed to 1-propanol they can become irritated, and some cases of allergic skin reactions can occur.

Consumers who have these products should stop using them and throw them out in a hazardous waste container, the FDA said. Do not pour these products down the drain or flush them.
