

Use of bronchodilators down for bronchiolitis treatment in infants

July 6 2021

(HealthDay)—Bronchodilator therapy for the treatment of bronchiolitis

in infants decreased significantly from 2010 to 2018 , according to a study published online July 6 in *Pediatrics*.

Kristen H. Shanahan, M.D., from Boston Children's Hospital, and colleagues assessed trends in and outcomes associated with the use of bronchodilators for bronchiolitis. Using 2010 to 2018 [data](#) from 49 [children's](#) hospitals, the authors reviewed 446,696 emergency department visits involving [infants](#) (
