Six passengers from a Royal Caribbean cruise have tested positive after the ship docked in the Bahamas. Royal Caribbean said Friday, July 30, 2021, that four of them are adults who were all vaccinated against COVID-19, and two are minors who were not vaccinated. Credit: AP Photo/Brynn Anderson, File

Six passengers who sailed on a Royal Caribbean ship tested positive for COVID-19 near the end of their cruise and were immediately quarantined, the company said Friday.

The passengers – four [adults](#) and two minors – were on the Adventure of the Seas ship for a 7-day trip that left the Bahamas last Saturday and returned on Friday, said Royal Caribbean spokeswoman Lyan Sierra-Caro. They were tested Thursday while the ship was at sea.

The adults were all vaccinated against COVID-19, Sierra-Caro said, and one has mild symptoms of the virus while the other three do not. They were not traveling together.

The two minors—who were in the same group but not traveling with any of the four adults who tested positive—were not vaccinated and were not showing symptoms, the spokeswoman said.

All six are American citizens, Sierra-Cano said. They were quarantined and people traveling with them were traced and tested negative, she said.

Sierra-Cano said the six passengers would fly back to the U.S. on [private transportation](#) at Royal Caribbean's expense and won't need to quarantine in the Bahamas.

The ship was in Freeport, Bahamas, on Friday, where other passengers were free to go on shore, and the cruise will end Saturday in Nassau as scheduled. Sierra-Cano said the company would tell other passengers about the infections once they were all back on board Friday.

Royal Caribbean Group says it requires passengers who are 16 or older to be fully vaccinated and provide a negative test for COVID-19 before boarding, and children who aren't old enough for the vaccines must test negative. All crew are fully vaccinated, according to the company.
