

# Challenges persist for pediatric clinical trials

March 22 2022

---

Early discontinuation and nonreporting/nonpublication of findings continue to be common issues for conducting pediatric clinical trials, according to a study published online March 22 in *Pediatrics*.

Ryan Brewster, M.D., from the Stanford University School of Medicine in California, and colleagues characterized the prevalence of and factors associated with early discontinuation, results reporting, and publication of clinical trials enrolling participants
