Unvaccinated children aged five to 11 traveling with a fully vaccinated adult will no longer need a COVID-19 test to enter Canada beginning Monday, the federal government said.

Pre-entry tests will still be needed for partially vaccinated or unvaccinated travelers over the age of 12 who are eligible to travel to

Canada.

Children under five years of age don't currently require a COVID-19 test to enter Canada.

Government officials announced several other small changes to ease restrictions for [international travelers](#) taking effect on Monday.

Fully vaccinated travelers, and children under 12 accompanying them, will no longer need to provide their quarantine plans when they enter the country.

Vaccinated people arriving in Canada won't need to wear a mask for 14 days, keep a list of contacts or report COVID-19 symptoms.

Travelers will also no longer need to quarantine if someone in their group develops COVID-19 symptoms or tests positive.

All travelers are still required to use the ArriveCAN app to upload travel and vaccination information within 72 hours of their arrival to Canada and/or before boarding a plane or [cruise ship](#) destined for Canada.

"All travelers, regardless of vaccination status, must also continue to wear a mask throughout their entire travel journey," the government said in a news release.
