

# Immunotherapy combined with targeted therapy for colorectal cancer yields promising outcomes for patients

January 26 2023

Greater tumor cell-intrinsic immune program induction and MAPK pathway inhibition in patients with better outcome. **a**, *t*-distributed stochastic neighbor embedding plot of 419,551 cells color coded for the indicated cell type. ILC, innate lymphoid cell; NK, natural killer cell; Tgd, gamma-delta T cell; Tprolif, proliferating T cell. **b**, Percentage of indicated cell types (on- versus pretreatment biopsies) in patients with PFS > 6 months ( $n = 11$ ) and patients

with PFS 6 months and PFS
