

Hair analysis shows child drug use could be twice as high as previously thought

March 6 2023

Pie chart depicting substance use by detection method and grouping. Percentage represents number of cases in each category of the total (n=249). “High-Risk Hair” indicates cases positive for hair testing and whose hair was selected due to scoring relatively high on the hair selection risk algorithm; “Low-Risk Hair” indicates cases that scored low on the hair selection algorithm and were randomly selected for hair analysis; “Self-Report” indicates cases that reported any substance use; “Both” indicates cases with positive hair results and self-report of any substance use. As per NIDA and ABCD Study reporting

requirements, cell sizes
