Efficient deletion of *Wt1* in coronary ECs from *Wt1KO*^{ΔEC} mouse model. (A) Schematic illustration showing the tamoxifen administration scheme and the

experimental strategy to obtain Wt1KO^{ΔEC} and control mice. Pregnant mice carrying control and Wt1KO^{ΔEC} embryos were administered tamoxifen in the early stages of coronary formation onset (E11.5-E13.5) and embryos were analyzed at E15.5. (B) qRT-PCR analysis of Wt1 expression in heart ventricles from Wt1KO^{ΔEC} and control mice. Data are mean±s.e.m. (n=4 or 5). *P
