

Made-to-order diagnostic tests may be on the horizon: Researchers invent lab on a chip that can be 3D-printed in minutes

November 29 2023

Digital manufacturing (DM) of functional capillary circuits (CCs) using an intrinsically hydrophilic ink (CCInk). a) 1) Additive manufacturing of CCs from a digital design file using a light engine and layer-by-layer vat photopolymerization. 2) Removal of uncured CCInk under a stream of compressed air (
