

# Climate change could be impacting Australian babies' birthweight for gestational age

January 8 2024, by Samuel Jeremic

## SGA

Adjusted HRs of SGA and LGA associated with the weekly specific UTCI over the 12-wk preconception (–11 to 0) through to gestational week at delivery (1 to 42) at different thresholds of UTCI using the median of 14.2°C as reference. Solid blue lines represent point estimates, and the shaded area represents 95% CIs. Note: CI, confidence interval; DLNM, distributed lag nonlinear models; HR,

hazard ratio; LGA, large for gestational age at >90% birth weight; SGA, small for gestational age at
