

# Metformin and AGIs show potential for improved outcomes in COVID-19 patients with type 2 diabetes

June 21 2024

The forest plot to describe adjusted Hazard ratio for in-hospital all-cause mortality in the multivariate Cox regression model. The names of covariates included in the cox regression model were listed on the left of the figure and adjusted HR, 95% CI and *p*-value were shown in lines and points. (*p*
