Prenatal, postnatal homelessness tied to poor health in children

25 September 2018

(HealthDay)—Homelessness is associated with an increased risk of adverse pediatric outcomes regardless of whether it occurs prenatally or postnatally, according to a study published online Sept. 3 in Pediatrics.

Megan Sandel, M.D., M.P.H., from Boston Medical Center, and colleagues interviewed 20,571 low-income caregivers of children
