

General, abdominal adiposity linked to mortality in Mexicans

13 August 2019

(HealthDay)—General and abdominal adiposity are associated with mortality in a population of Mexican adults, according to a study published online Aug. 13 in the *Annals of Internal Medicine*.

Louisa Gnaniuc, from the University of Oxford in the United Kingdom, and colleagues examined the causal relevance of adiposity to [mortality](#) in Mexican adults in a prospective study involving 115,400 [adults](#) aged 35 years to
