

Many with atherosclerotic CVD not meeting LDL-C goals

15 November 2019

(HealthDay)—A high proportion of patients with atherosclerotic cardiovascular disease (ASCVD) do not achieve recommended low-density lipoprotein cholesterol (LDL-C) goals, according to a study presented at the annual meeting of the American Heart Association, held from Nov. 16 to 18 in Philadelphia.

Joseph Allen, from the American College of Cardiology in Washington, D.C., and colleagues examined LDL-C goal attainment (LDL-C
