

# Pandemic slows for fourth week

September 24 2021

---

The coronavirus pandemic continued to slow down for a fourth week in a row around the world.

Here is the global state of play based on an AFP database.

## Slowing down

The number of new daily cases dropped globally by eight percent last week to 510,000, according to an AFP tally to Thursday.

However, the [confirmed cases](#) only reflect a fraction of the actual number of infections, with varying counting practices and levels of testing in different countries.

## Improvement almost everywhere

The situation improved in many regions of the world, with 32 percent fewer cases in Africa, 25 percent fewer in the United States and Canada, 21 percent fewer in the Middle East. Cases were down seven percent in Asia and two percent in Oceania.

But the situation deteriorated in Latin America and the Caribbean, with a 33 percent increase, largely due to a catch-up in figures in Brazil, and with a slight four percent increase in Europe.

## Biggest spikes

Singapore was the country where the epidemic picked up most speed with 129 percent more daily cases. Romania followed with 75 percent more, Ukraine 58 percent more and Syria and Turkey with 23 percent more each.

## **Biggest drops**

At the other end of the spectrum, Botswana saw 51 percent fewer cases this week, followed by Japan (50 percent less), Sri Lanka (43 percent down), South Africa (39 percent down) and Azerbaijan (38 percent down).

## **US has most infections**

The US remained by far the country with the biggest number of new cases, with 126,000 per day, nevertheless that is a decrease of 26 percent. Next worst was the United Kingdom with 32,400 cases, a 10 percent increase, and Turkey (31,200), a 23 percent increase).

On a per capita basis the country that recorded the most new cases over the week was Serbia with 653 cases per 100,000 inhabitants), followed by Mongolia (630) and Cuba (496).

## **... And most deaths**

The US also mourned the biggest number of deaths with 2,041 per day. It was followed by Russia (801), which on Friday marked a new daily record of 828 deaths, and Mexico (542).

At a global level the number of daily deaths decreased by nine percent to 8,384.

## Vaccinations

With its homegrown three-dose vaccines, Cuba led the vaccination race this week among countries with more than one million inhabitants, inoculating 2.69 percent of its population every day.

Cambodia (1.46 percent) and Iran (1.36 percent) completed the podium.

Even though they are vaccinating more slowly, the United Arab Emirates has the most advanced vaccination drive, having administered 199 doses per 100 inhabitants. Uruguay follows with 176 and then Israel on 171.
